

# MARBLE - A SYMBOL OF SUCCESS TOO.

A STORY CARVED FROM SCRATCH - JABALPUR MARBLES.

**"Our success has a simple formula. We believe in availability of material (even over 100 tonnes per day), good productivity of marbles and having the resources and acumen to run the biggest marble mines."**

**Mr. Mohammed Abbas, Director.**

Marbles have for long been associated with tales of love and sacrifice. They've also been a source of inspiration for those who wished to redefine architecture in a country that has always basked in the glory of priceless art and aesthetics. But here's a story associated with marbles that purely spells success. Nothing but **SUCCESS.**

A tale that began in the year 2006. Started as AW and Sons, Jabalpur Marbles, right from day one, had in-depth expertise in the manufacturing, exporting and supplying of a creatively designed range of Rock Face Mix Colour Marble. These marbles are best known to beauty walls of homes, offices, hotels and a lot more places that crave for art. And it's this beginning that helped Jabalpur Marbles (JM) take the leap from lakhs to crores, in terms of turnover.

## A journey of quality.

Talking about the company's success today, Mohammad Abbas- Director says "Our success has a simple formula. We believe in availability of material (even over 100 tonnes per day), good productivity of marbles and having the resources and acumen to run the biggest marble mines & Gang-saw in Mahakoushal region. And this is what makes us different from our competitors."

## Pride in even Project.

Talking about successful/completed projects including Jujawal Marble Mines and highly successful running projects like Ghutehi Marble Mines and Nimas Marble Mines, Mr. Mohammed adds "Though we lead from the front in the Marble Industry, sometimes we face difficulties. Like Govt & NGT, NOC issues or even the hardness of the marble. This is when having a partner like Volvo CE helps. We bought the Volvo EC360BLC Excavators and, believe it or not, production and efficiency increased substantially." He further says "Our first two Volvo machines have played key roles to complete arduous tasks within specified time."

Volvo CE unleashing its full potential at site.

## The fleet that does it.

Owning a fleet of Volvo CE has only added to the strength of Jabalpur Marbles. Having a total of 8 including 6 EC 360BLC, 1 EC 380DL AND 1 L220F has totally been worth it. No wonder, the company won the Mine Safety and Maintenance Award in 2014. When asked what's so special about the Volvo CE fleet, Mr. Mohammed says "They're more than just machines. Known to be fast working, the fleet ensure higher production. What's more, money and time saving become a norm when you own these machines. He adds "Greater fuel efficiency, good quality, reliability & support and timely fulfilment of service parts and requirements have just added to the advantage."

A load full of power Volvo CE.

## Dealing with the best.

A dealer for over 6 years, Navin Infrasolutions Pvt. Ltd. offers all the advantages one would expect from a Volvo CE dealer. Known for having a very professional team offering great service, the right machines, quick problem-solving capabilities and all of that just make them the most preferred dealer in the region, they are nothing but the best." And that's just a bit of appreciation for a man like Navin Bhandari, Director, Navin Infrasolutions Pvt. Ltd., quips Mr. Mohammed.

## The future.

On a mission to grow tremendously and serve a wider section of the society, Jabalpur Marbles already has a plan charted out. "With focus on M-sand Plant in Bangalore, some river sand excavation work and extending the entire marble expertise, are a few things that will happen in the near future. And this isn't possible without a vision, great team, hard work, and VOLVO CE and Navin Infrastructure Pvt. Ltd. - a few words he (Mr. Mohammed) shares before he walks out.

Jabalpur Marbles and Volvo CE. Leaving no stone unturned.
